EDUCATION

VIT Bhopal University <i>B.Tech in Computer Science and Engineering (Cloud Computing and Automation)</i>	Sep 2023 – May 2027 CGPA: 8.91/10
G.D. DAV Public School, Deoghar <i>Class XII (CBSE)</i>	2022 Percentage: 89.2%
St. Francis School, Deoghar <i>Class X (ICSE)</i>	2020 Percentage: 85.6%

TECHNICAL SKILLS

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks
Languages: Java, Python, JavaScript, SQL
Systems & Backend: Distributed Systems, Microservices, Service-Oriented Architecture, REST APIs
Cloud & Infrastructure: AWS (Lambda, Step Functions, API Gateway, DynamoDB, S3, EC2, CloudWatch, EventBridge, IAM, Bedrock, Rekognition, CloudFormation)
Databases: MongoDB, MySQL, DynamoDB
Frontend: React.js, HTML5, CSS3
DevOps & Tools: Docker, Kubernetes, Git, CI/CD, Postman, n8n, Agile

EXPERIENCE

Cloud Engineering Intern (Backend Systems) <i>IPAGE Group</i>	Aug 2025 – Jan 2026 <i>Remote</i>
- Architected and deployed 30+ serverless microservices using AWS Lambda, enabling scalable backend workflows for a production platform serving 500+ users. - Reduced AI content generation costs by 88% through intelligent routing across GPT-3.5 and GPT-4 based on request complexity. - Built backend services for token management, transaction tracking, and role-based access control with real-time notifications. - Integrated distributed storage (S3, DynamoDB) and event-driven workflows to ensure high availability and fault tolerance. - Worked in Agile environment with CI/CD pipelines for automated build, testing, and deployment.	

PROJECTS

Sahayak AI <i>AWS Lambda, Bedrock, DynamoDB, S3, EventBridge, Python, React</i>	Sep 2025 – Jan 2026
- Developed a multilingual AI assistant using 20+ AWS Lambda functions and Amazon Bedrock for context-aware responses across 4 languages. - Built an NCERT data lake on S3 with vector indexing and RAG pipeline, reducing query latency by 70% through semantic retrieval. - Implemented event-driven architecture using EventBridge for scheduled content delivery and real-time interaction workflows. - Designed scalable backend workflows to handle concurrent user requests efficiently.	
SafeX 3.0 <i>AWS Rekognition, Lambda, API Gateway, MongoDB, Python, React</i>	Feb 2025 – Apr 2025
- Designed a scalable 3-factor authentication system combining password, facial recognition (99% accuracy), and OTP verification. - Developed REST APIs and backend services to orchestrate multi-layer authentication workflows. - Engineered secure and scalable architecture ensuring reliable access control and system performance.	

CERTIFICATIONS & ACHIEVEMENTS

- AWS Certified Cloud Practitioner** — Apr 2026 (Score: 1000/1000)
- IBM DevOps & Software Engineering Professional Certificate** — Feb 2026
- AWS Generative AI and AI Agents with Amazon Bedrock** — Jan 2026
- Google IT Support Certificate** — Mar 2026
- Top Performing Candidate** — ET AI Hackathon 2026, The Economic Times (May 2026)
- Winner** — Nebula Nexus Hackathon, MIT Jaipur (2025)
- Problem Solving (LeetCode):** 180+ problems solved, active in weekly contests (rating 1500)
